INTRODUCTION

Patents help inventors and companies protect their invention. However, the protection is effective only if the patent is drafted well and with strategic intent. This workshop aims to share learning and experiences relating to effective drafting of patent specifications. The workshop will also aim to share some learning and best practices from NCL's Intellectual Property Group. The workshop will include lectures, live demo interview of an inventor, case analysis and practical sessions.

COURSE OUTLINE

- Quick review of contents/ sections of a patent specification and intended purposes
- Mock invention disclosure meetings, identifying/defining the invention, drafting potential claims, planning prior art searches
- Sources of novelty and arguments for inventive step
- Drafting of title, background and prior art, summary, detailed description, embodiments and examples; Drafting of provisional specification
- Claim drafting in depth - drafting, claim staging, strategies
- Small practical exercises in drafting for attendees

OBJECTIVE

- This workshop aims to share learning and experiences relating to effective drafting of patent specifications.

WHO IS IT FOR?

- Participants need to have prior basic knowledge of patents.
- IP professionals want to improve their drafting skills
- IP analytics professionals wanting to learn more about drafting.
- Inventors/scientists wanting to understand how inventions can be protected better using good drafting

WORKSHOP SCHEDULE

Date	Timing	Session title
Day 1	14.00-15.30	<ul style="list-style-type: none">• Registration• Workshop introduction• Lecture 1: Introduction to patent specifications
	15.30-16.00	Tea
	16.00-18.00	<ul style="list-style-type: none">• Demo: Mock invention disclosure meeting• Exercise: Interview of the inventor by participants (in groups)• Presentations and inputs
