Session 4-Comments and Suggestions					
How do you think these workshops can be improved further?					
As a Person with design backgroud,more focus I expect on engg(mechanical) & Design.					
Duration of the workshop for atleast I week,to solve more & more problems,discussion session should also included.					
duration of worshop can be longer,like for 4-5 days,at the end of which the patent drafting hands on can be carried out.					
involve examples in biolmed domain,more people working in this domain than biology.include live patent drafting interaction,for a common cas-study instructor drafts claims live.					
keep the contents little less.many points could not be discusseed duw to paucity of time(audience have many queries,speakres wanted to attend but time was not enough.)					
team activity could be included during workshop rather than as homework.					
Domain Specific introductory topics can be kept common ao all students,however in depth domain specific can be in separate rooms in parallel.					
More time can be made available for the drafting workshop,particularly since it is a group activity,alternatively,we may have a dedicated time 1-2 hrs.					

Domain Specified.
pls add real world examples of product cases, examines Query,prosecutions handling session should be created,live drafting exercises in laptop,including formatting,template for drafting provisional & Complete specification including.
More practicals needs, not long but more interactive.
I am satisfied with all talks, administration & time mgmt.
by applying domain specific timing rather than clubbing all in one(eg.food technology domain)
study material & Assignment should be given before workshop(after payment of regn.fee)
Pls keep a dedicated workshop on actual writing/drafting of patents & its correction by IP expert people.
Time management.
At least one Patent includes diagram should be discussed.
Workshop carried out well.
Please suggest a topic on which you wish to have workshop on?
Non patent literature
